A charity providing access to & education about
The National Fruit Collection

About Brogdale Collections

We are home to the National Fruit Collection, which is made up of over 3000 different varieties of apples, pears, plums, cherries, quince, medlars, cobnuts and more.

We have over 150 acres including orchards, a wildlife garden, an interactive weather station, meadows, a world music garden, play park and learning lab. Explore nature whilst discovering how fruit is grown and how climate and insects play their vital parts. Fun interactive learning!

Module Days at Brogdale...

Days run from approximately 10am-2pm and include a morning and afternoon session. Lunch can be enjoyed in our picnic area & play park or inside in our classroom area.

Sessions are led by a Brogdale Collections Tutor and all learning materials are provided. The day will encompass fun and educational hands on learning, discussions and interactive activities.

Once the educational visit is booked, teachers are provided with a complementary pre visit to discuss their requirements in more detail.

Activities vary within the module depending on the age group visiting and topics being studied in school. All modules are suitable for KS1 & KS2 classes. Covering National Curriculum attainment targets across Science, Geography and DT.

Learn about ...

LIVING SCIENCE

A whole day discovering the fascinating lives of the plants & wildlife within the National Fruit Collection.

Module Content:

Plant Growth • Seeds • Pollination • Mini Beasts Habitats • Cultivation • Lifecycles & Food Chains Blossom (April/May) •

MEASUREMENTS, MAPS & MATHS

Explore the National Fruit Collection using maths & geography skills in fun and practical ways.
